Re: Annual HMA Plant Approval
Facility: H0354

Gentlemen:

On March 25, 2011 personnel from the Materials Bureau staff completed inspection of your bituminous concrete production facility located in Flushing, New York.

As a result of this inspection, it has been determined that the physical plant features, the automation and recordation equipment at this facility are in conformance with the requirements outlined in New York State Department of Transportation's Materials Procedure 401, dated June 2010.

Approval is hereby given to supply bituminous concrete from this facility to department projects during the 2011 construction season.

Your continued approval will be contingent upon satisfactory and timely completion of the scale checks, adherence to an approved control plan, and all applicable safety requirements.

Yours truly,

A handwritten signature in cursive script that reads "Paul Anderle".

Paul Anderle,
Regional Materials Engineer, R-11
